MILK PRICE HIGHLIGHTS

Class I prices: Early January prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.49 per hundredweight for about 150 markets, according to the Crop Reporting Board. This was 10 cents above December 1972 and 30 cents above a year earlier. Regional gains from a year earlier ranged from 40 cents in the South Atlantic Region to 7 cents in the Pacific Region.

Store milk prices: Store prices to consumers in 25 major cities in early January averaged 59.5 cents per half gallon for the most common grade of milk, 0.6 cent above December and 2.1 cents above a year earlier.

Home-delivered prices: Early January prices for home-delivered milk averaged 70.0 cents per half gallon for 25 major cities. This was 1.0 cent above last month and 2.3 cents above January 1972. Home-delivered prices represent list prices before deductions for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS
OF MILK FROM PRODUCERS

Preliminary November sales: Preliminary data on total sales of fluid dairy products during November in 61 marketing areas averaged nearly 1 percent above a year earlier.

October sales: Revised total sales of fluid products for October in 61 regulated markets averaged 2 percent above a year earlier.

Whole milk sales in October were about the same as a year earlier.

Low-fat and skim milk sales during October gained nearly 8 percent over a year earlier. Cumulative sales in 1972 continued 11 percent above 1971.

Milk and cream mixture sales (mostly half and half) averaged about the same as October 1971 while total cream sales were up 1 percent.

Milk receipts: November receipts of milk from producers at plants regulated for 63 marketing areas (61 Federal and 2 State) were down 2.0 percent from a year earlier. The number of producers delivering milk to plants for these same markets was down 2.5 percent from November 1971.

Milk production: United States milk production in December was estimated at 9,406 million pounds, 0.2 percent less than a year earlier. December output provided 1.45 pounds of milk per person for all uses, below the 1.46 pounds a year earlier but slightly more than the November supply of 1.43 pounds.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class 1 prices, reported by principal producers' associations. Over-order payments may not apply to all Class 1 milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary sales: Preliminary data on total sales of fluid dairy products during the year 1972 in 61 marketing areas averaged 2 percent above a year earlier. Preliminary total sales for December 1972 were about the same as in 1971.

November sales: Revised total sales of fluid products for November in 61 regulated markets (58 Federal and 3 State) averaged about 1 percent above last year.

Whole milk sales in November were down about 1 percent from year-earlier sales of 2.6 billion pounds.

Low-fat and skim milk sales during November were 8 percent above year-earlier sales of 808 million pounds. Cumulative sales through November 1972 were nearly 11 percent more than a year earlier.

Milk and cream mixtures sales (mostly half and half) averaged nearly 3 percent below November 1971 sales of 33 million pounds. Sweet and sour cream sales were about the same as the 26 million pounds for November 1971.

Milk receipts: December receipts of milk from producers at plants regulated for 63 marketing areas (61 Federal and 2 State) were 1 percent less than a year earlier, and the number of producers delivering milk to these markets was down nearly 4 percent.

Milk production: United States milk production in January was estimated at 9,630 million pounds, down 1 percent from a year earlier. January output provided 1.48 pounds of milk per person daily for all uses, slightly less than a year earlier, but more than the 1.45 pounds a month earlier.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class 1 prices, reported by principal producers' associations. Over-order payments may not apply to all Class 1 milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

2/ Revised.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS
OF MILK FROM PRODUCERS

December 1972 sales: Revised December sales of fluid products in 61 marketing areas (58 Federal and 3 State) averaged 0.5 percent below last year's 3.5 billion pounds.

Whole milk sales during December 1972 were down 3 percent from year-earlier sales of 2.6 billion pounds.

Low-fat and skim sales for December 1972 were up about 7 percent from year-earlier sales of 827.8 million pounds.

Milk and cream mixture sales (mostly half and half) averaged about 3 percent below December 1971 sales of 35.7 million pounds. Sweet and sour cream sales were down nearly 3 percent from the 32.5 million pounds for December 1971.

Milk receipts: January receipts of milk from producers at plants regulated for 63 markets (61 Federal and 2 State) were down 2 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down 4 percent from January 1972.

Milk production: United States milk production in February was estimated at 9,055 million pounds, down 4 percent from a year earlier. Most of the decrease from a year earlier reflects the extra day in February last year. On a daily average basis, the decrease in production from 1972 was less than 1 percent. February output provided 1.54 pounds of milk per person daily for all uses compared with 1.56 pounds a year earlier and 1.48 in January 1973.

ANNUAL SALES AND RECEIPTS

Sales during 1972: Sales of whole milk of 80.4 million pounds during 1972 in 61 marketing areas were about the same as 1971. Whole milk items include plain and flavored whole milk. The marketing areas include 58 Federal and 3 State markets for which comparable data are available for 1971 and 1972.

Low-fat and skim milk sales were up about 11 percent from 1971. Fluid items in this group include plain, solids-added, and flavored skim and low-fat milk, buttermilk and cultured specialties. Milk and cream mixture sales (mostly half and half) were down 2 percent from 1971. Sales of cream items were up almost 1 percent.

Receipts during 1972: Daily receipts of milk from producers at regulated plants averaged 190 million pounds in 1972--about 1 percent above 1971. Data for regulated plants include 61 Federal and 2 State markets which are comparable for the years 1971-1972. The average number of producers in these markets during 1972 was about 138 thousand--down nearly 4 percent from 1971. Daily deliveries to plants by these producers averaged 1,377 pounds--up 5 percent from 1971.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

MILK PRICE HIGHLIGHTS

Class I prices: Early June prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.84 per hundredweight for about 150 markets, according to the Crop Reporting Board. This was up 5 cents from May and 62 cents above a year earlier. Gains from a year earlier ranged from 49 cents in the Pacific region to 68 cents in the South Atlantic region.

Store milk prices: Store prices to consumers in 25 major cities in early June averaged 61.4 cents per half gallon for the most common grade of whole milk. This was unchanged from May but 3.1 cents above June 1972.

Home-delivered prices: Home-delivered milk averaged 71.8 cents per half gallon in early June for 25 major cities. This was 0.5 cent above May and 3.5 cents above June 1972. Home-delivered prices represent list prices before quantity or other discounts.

NOTICE: As announced in May 1973 this report is being discontinued after this issue.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Whole milk sales during March were up 1 percent from the 2.6 billion pounds of March 1972.

Low-fat and skim milk sales for March were up 10 percent from the year-earlier total of 864 million pounds.

Milk receipts: April receipts of milk from producers at plants regulated for 62 markets (60 Federal and 2 State) were down 2 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down 4 percent from April 1972.

Milk production: May 1973 milk production was estimated at 11.1 billion pounds, 2 percent less than a year earlier. May output provided 1.70 pounds of milk per person daily for all uses, compared with 1.66 pounds last month and 1.75 pounds in May a year ago.

^{1/} Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.
